# Who's RP Vending

RP Vending Systems, a division of H.Stossel and Partners Pty Ltd. has been established since 1995.

Head office is located in North Ryde, Sydney with factories and warehouses in Hornsby, Sydney and Moorabbin Melbourne.

RP Vending Systems manufactures machines locally as well as importing an extensive range from Europe. Machines are designed for individual needs and our aim is to achieve a unique solution for our customers. This may relate to a staff facility, customer service, profitability or security issues.

Our electronic credit system, imported from Coges in Italy, compliments our range of machines. Contactless electronic payment systems, accessed via key or card, provides simple, reliable, management of purchases from automatic vending machines. Electronic Cash Systems (ECS) have long been associated with the operation and security of vending machines throughout the world. With a cashless payment system you can increase sales, achieve greater control of accounting, data and transactions as well as providing a simple purchase method. The key and card system can be integrated with many other applications, not just the vendors. RP Vending Systems can provide the complete solution. Starting with compact machines, RP Vending Systems has the ability to provide machines to suit any type of application, providing total service vending.

Single machines can be configured to offer a wide range of products which include drink, snack, fresh food, toiletries and many more in order to satisfy every need. Banks of machines which include coffee, fresh food, snack, drink, and vendors which dispense any product are stylish and innovative.

Vending systems can be designed for your individual needs. Providing you with a convenient and low maintenance solution. Systems are designed to satisfy customers, and staff needs, ensuring a secure reliable and cost effective facility.
